PREPPI

We have had a request from our manufacturers for a less expensive alternative to the western sun specialist fabric **Opic 270**, which could be used in domestic applications. Our fabric Preppi is a cheaper version of Opic but can achieve the same energy saving results. We do stress that this fabric is only suitable for domestic applications as it is not fire-rated and is 1800mm wide and not 2700mm like Opic. The price for cut lengths is \$45plm.

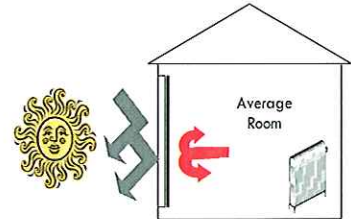

Preppi

FREQUENTLY ASKED QUESTIONS

"But how much do I save?"

From consumers to architects and engineers, we are asked the same question. "How much will I save by using the Svensson Blind Fabrics?" It's a difficult question to answer as every room/building has different characteristics that will change the results. We have come up with an averages chart for approximate guidelines which

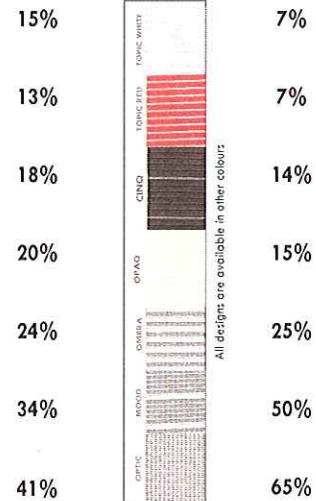

SUMMER
AND
WINTER
CLIMATE
CONTROL

REDUCE THE NEED FOR
COOLING BY UP TO 41%

REDUCE THE HEATING
COST BY UP TO 65%

BY USING

Design & Function with Commercial & Domestic Upholstery

Opposite: These '70s style reception chairs were given a great facelift using **PLEXI** Reversible Wool Fabric 100,000 rub.

For those of our clients who require a slightly more technical chart, see below:

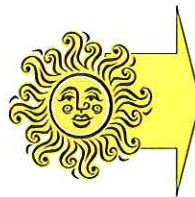

SOLAR ENERGY CONTROL TO REDUCE AIR-CONDITIONING COSTS

SUMMARY

USING ALUMINIUM REDUCES INCOMING SOLAR RADIATION ('g' FACTOR) BY:

	DOUBLE GLASS (0.77)	SINGLE GLASS (0.87)
OMBRA - WHITE GREY BLACK	g = 0.48	g = 0.47
	g = 0.48 or 61%	g = 0.48 or 81%
	g = 0.49	g = 0.48
MOOD - WHITE GREY BLACK	g = 0.33	g = 0.30
	g = 0.35 or 120%	g = 0.32 or 172%
	g = 0.36	g = 0.32
OPTIC - WHITE GREY BLACK	g = 0.26	g = 0.21
	g = 0.28 or 176%	g = 0.23 or 278%
	g = 0.29	g = 0.24
